I hope you enjoy the following list of early copper. I've had a great month acquiring new material having bought a significant Half Cent collection and two extensive Large Cent collections. Acquisitions from the Dechsner and Phil Mann sales are also offered. I have an extensive selection of 1794 Cents, several rare Draped Bust varieties, plus an exceptional group of Classic Head Cents highlighted by a condition census 1813 S-293. Among Middle Dates there is a mint state 1830 N-1, and an example of the rare 1835 N-18. The Late Dates include a nice VF 1847 N-23 as well as several scarce varieties in mint state.

I will be attending the Norweb sale in NYC November 13-15. If you would like me to examine lots and execute bids for you I will be happy to do so, and charge a very modest commission.

I will also be attending the following conventions St Louis Nov 9-12, Dallas Dec. 7-11, FUN Orlando Jan 2-8, J.H. Robinson Sale Jan. 25-30, Long Beach Feb. 1-5. Hope to see some of you.

Chris.

WE OFFER THE FOLLOWING TERMS OF SALE

1. All Coins GUARANTEED Genuine - This is a LIFETIME Guarantee!
2. All attributions are guaranteed correct - also LIFETIME Guarantee!
3. The IDENTIFIED POPULATION estimates (RARITY) of varieties change as more pieces of Copper are attributed, and it is IMPOSSIBLE to have an ACCURATE rating! But, we do use the most up-to-date data available - as reflected in "Copper Quotes by Robinson". (CQR)
4. STRICT ANA & EAC guidelines are used in grading, which consist of assigning a grade based on the state of preservation/wear of the piece. We then describe the condition of the coin so that you will have as good an idea as possible of what the coin looks like without actually being able to see it in person. It is our intent that there be NO SURPRISES when you receive the coin. Virtually all old Copper has accumulated some marks in their lifetime since leaving the Die/Mint - It is our intent to describe any such marks of significance. We now introduce a new term - VALUE GRADING!!

Sharpness Grade is far easier to describe in consistent terms, and where there may be circulation defects such as porosity, gouges, rim dings/nicks/bruises, corrosion and other such detractors, arriving at a NET GRADE is certainly subjective at best. The grade that we have assigned on the first line describing each coin is intended to represent this NET GRADE/VALUE GRADE.

If the Second Line does NOT start with a Sharpness grade, then it is our opinion that the NETGRADE of the coin is the SAME AS the SHARPNESS GRADE of the coin, and that there are NO SIGNIFICANT defects worth mentioning. Perhaps NOT PERFECTION, but whatever marks or other elements that may be present, do not deduct from the over-all appearance/grade of the coin, and are mentioned for accuracy.

5. A Full 30 DAY return privilege is allowed for any or no reason. Our business is based upon attracting repeat customers, and it does none of us any good for you to keep a coin with which you are not completely satisfied. The 30 day period is an approval period, and we welcome any of our customers to show their purchases from us to any other EXPERIENCED EAC member for another opinion. Sales are final after the 30 day period, but we will certainly consider extensions in this time limit upon any reasonable request.
6. All coins are guaranteed to meet ANACS certification for grading! Any coin graded lower by ANACS can be returned within 120 days for immediate refund of the full purchase price plus all ANACS certification service fees.
7. All orders are sent postpaid.
8. Approval service is available to established clients with 7 day terms.

We are always interested in buying Early Copper & Type Coins! If you have coins to sell, we would be happy to have you contact us. We are willing to PAY STRONG PRICES for NICE coins. We will also accept coins on a consignment basis at a reasonable commission. Please feel free to contact either of us with ANY questions that you may have:

	Smooth light brown with reddish tan highlights. Problem free.		
1847	N-6 R1 AU50		\$ 145.00

	AU55 Lustrous golden brown with just a trace of red on the rev. Some faint hairline scratches on the obv, one curving across neck, one in front of face. These are not distracting to the naked eye. Very scarce in higher grades. I am aware of one mint state coin & three other AU50 coins one of which was the RS Brown coin.		
1847	N-21,40 AU50		\$ 225.00

	Lustrous tan with some olive tone. Light handling marks. Little in the way of real wear. Fairly scarce in higher grades. This variety shares the same reverse as N-36 which is a true rarity. And also shares many of the same obverse diagnostics. Though clearly not struck from "identical" dies it is not inconceivable that the same dies, the obverse heavily lapped, struck both varieties.		
1847	N-38 R3 VF30+		\$ 55.00
	VF35 Glossy tan. Cpl trivial marks, little bit of dirt rev.		
1847	N-38 R3 MS60		\$ 485.00

COMMENTS

The Herbert M. Dechsner Sale

The recent auction of the Herbert Dechsner collection was remarkable not only in the quality and the extent of the collection but also in the diverse results of the sale. There were essentially four distinct collections of interest to EACers, the Half Cents, the Large Cents and the Hard Times Token which were sold the first night, and the Colonial collection which was sold the second night.

Attendance at pre sale lot viewing was relatively sparse. There were none of the long waiting lines to view lots as there were at the Hy Halpern sale of a few months ago. Many of the principal Half Cent and Large Cent collectors though probably represented by agents were absent in person. Many of the Hard Times and Colonial collectors not only were there in person but had come in a week early to view lots. Thus the lot viewing rush was avoided. But also missing was some of the pre sale atmosphere. The mix of gossip, deal making, wowing, bluffing and positioning, the buzz that gives everyone an idea, or at least the impression of an idea how the sale will unfold.

The first nights sale was well attended. Prices on the whole were moderate to strong. Definately not outrageous or incerdible, superlatives descriptive of prices at the Halpern sale. The Half Cents were not a significant collection in terms of the number of specimens as there were only thirty lots. There were many significant pieces however. For example the 1796 no pole a nice VG opened at a mere \$8000 eventually going to a Pennsylvania dealer collector at \$13,500 presumably as trade bait. For those of you not familiar with this term, it refers to an item not needed for the buyers collection but one that might serve as a lure to effect a trade for a specimen that is needed. This is a common practice as often mere money will not provide sufficient leverage to bring about the aquisition of a very rare piece. But sometimes another very rare piece may prove attractive. In other words the owner of a V 1808 C-1 (should one become available) might be completely unmoved (possibly even insulted) by the offer of money for his treasure. But set a nice 96 no pole on the table... well now you're speaking the same language.

The 1802 C-1 reverse of 1800 went to the same Penn Dealer at \$9000. This time as agent for an Ohio dealer. A nice 1808 C-2 1808/7 described as AU50 but generally conceded to be EF by those present was bid up to \$5000 by NY dealer Tony Terranova for a client.

The Large Cents started with a nice F15 S-3 Chain which brought \$5250 not including the buyers commission to the same NY dealer, this time for stock. A S-7 & a nice attractive net F12 went to Del Bland bidding on behalf of a Florida collector for \$6250. I was the underbidder on this coin a nice smooth specimen. The mint made plan striations were much more distracting in the date than on the coin. The S-14 a nice black and tan coin net VF25-30 went to the same agent for the same collector at \$9500. The nest of a southern California dealer was feathered with lot #36 a beautiful brown and golden tan 19b at \$8000 plus juice. While the S48 went at a bid of \$3750 executed on behalf of a Maryland dealer. The nice V610 Jefferson head went to the same dealer as the Q2 C-1 and the S-272 a nice F12 went to the same dealer. The S-3 again apparently both for stock.

The early dates brought strong prices compared to a few years ago but at crazy prices. Many of the most important pieces went to dealers, unusual for an important sale such as this.

The middle dates were represented by many superb specimens. The 16 N-3 full AU55 went for \$4000 to Del again bidding for a Fla collector. This seemed like a very strong price as this piece was only a few points finer than the Halpern specimen which realized \$1700. Lot 82 a nice 18 N-1 went to Valenziano bidding for a Kentucky middle date collector. I bid in the N-4 a lovely MS60+ coin for a Northern California client at \$2100. At the same price the 22 N-7 a nice attractive cent of virtually mint state sharpness cleaned & recolored some time ago & now no better than AU50, though still equal to the finest known for the variety. The 23 N-2 a nice EF45 opened and went to the book at \$3000 as did the ugly 24 N-5 at \$900. The 34 N-6 triple profile needed a nice mint state coin went to a Florida collector of CC items. Some time later Del bid in the AU 37 N-14 at \$875 for a Kentucky collector (the one that didn't buy the 18 N-1 earlier) while I bid in the nice 37 N-16 for an Ohio collector.

There were many nice late dates the pricing of which continues to remain a mystery. For instance the finest 45 N-13 listed by JRF is AU55, a nice MS60+ here went for only \$850 to Doug Bird bidding for a Minneapolis collector. A beautiful full red 47 N-10 third finest also went for \$850 but at the same price a common type coin of this quality would bring. I raised the 48 N-34 high R6 probably the second finest known up to \$1400, it went to Florida via Del. A superb red and brown gem 53 N-23, the finest known opened to the book at \$1050. I tested the books sincerity with one bid before letting it drift away at \$1200. These prices seem a little low to me. As a dealer I can't afford to tie up capital waiting for the scarcity of some of these late date varieties to be recognized. And by saying that I don't mean to imply that I don't believe some supposed rarities are not over priced already, some are. But when a CC 1847 is bringing just a slight premium over a 53 N-25 in the same grade something's not right!

For some of us the end of the Large Cents meant a return engagement to the Carnegie, the only Deli in America where a \$7.95 corned beef sandwich serves four. But others stayed for the Hard Times Tokens. It was rumored that the collection had been "creamed" prior to its consignment & cataloging. At least sixteen pieces known to be in the Tilden collection were missing from the sale. Several higher grade specimens known to have been in the collection were apparently replaced by inferior coins. However there were still 139 varieties most of them in exceptional condition to be offered.

Hard Times collectors are somewhat circumspect in their bidding so I won't attempt to retrace what went where save to note that one wag suggested that the sale be renamed the Drs Bob sale as a substantial portion of the rarities in the sale went to a California physician Bob S. and a substantial number of the choice ones went to an Ohio physician also Bob S. I won't speculate as to the profound significance of this coincidence but have you ever seen both Bobs in the same room at the same time?

Perhaps the finest specimen of the sale was the first to go, a very choice Low #1 at \$5500 a strong but still reasonable price. Similarly lot #437 Low #2 & brought \$1700. Lot 460 a Low 2a the Adams plate coin brought a very strong \$1150 showing that Hard Times token collectors will pay for a degree to at least as great an extent as Large Cent collectors. Again lot 486 a slightly hairlined example of Low 57, a very scarce variety but expected to bring \$1500-2000, brought a whopping \$6000. While lot 491 Low 62a

, a specimen strike from an earlier state of the dies than a typical business strike example (therefore a legitimate contemporary piece rather than a restrike) brought a bid of \$4000, more in line with its condition and rarity. I should point out that at a sale such as this all the major players are represented. I offer here my opinions of relative value based on conversations with acknowledged experts such as Steve Tannenbaum. The reader will I'm sure consider the opinions of the collectors, as expressed by their bids just as carefully.

Occasionally a token is collected by more than one group of collectors. For instance lot 513 a low grade but problem free example of Low 87 desired by both Hard Times and Civil War token collectors as the only non civil war period token issued by Oliver Boutwell, a prolific issuer of Civil War store cards. This specimen brought \$4200. The usually popular Feuchtwanger composite tokens were somewhat soft. Two examples of Low 118 brought \$1400 and \$1150. The rare Low 119 a very lightly cleaned proof brought \$4250. This was not one of the better specimens known as all specimens of this variety were struck as proofs. In contrast to Low 62a this is likely a restrike of 1860s vintage (perhaps C.W.T. collectors should stake a claim!). Still the last specimen to trade about five or six years ago brought approx. \$10,000 more than twice as much. This example was expected to bring more.

In general the sale was very strong and brought record breaking prices in many areas. Rarities like Low 139 dark EF at \$1700, Low 149 VF \$3200, brought strong prices. High quality, Low 30 Gem BU probably finest known \$1300, Low 150 Nice AU \$4200, Low 151 AU 1400, Low 155 AU 3000, brought multiples of expected prices. This sale should do much to strengthen the Hard Times Token market. It will be some time until we see it's equal.

Not since the John Roper sale has anything close to the Dechsner collection of Colonials crossed the auction block. Close to 500 lots of Colonials, most of them choice or rare many both, were offered. The collection of state coinage was probably the finest to be offered since the Pine Tree Sale. The highlights of such a sale are too numerous to mention them all. Be assured all the major players were there. If there were mints to be collected, commodities to be traded, or oil wells to be drilled they would have to wait. Even the curator of the famous basement collection was there.

The New England Shilling about equal to the Roper specimen opened at 13.5 and was hammered down at a healthy \$22,000 to a California agent bidding for a well known collector. Lot #928 an excellent example of the Willow Tree Shilling also the Noe plate coin brought \$38,000; \$10,000 more than a superior specimen brought in Roper. Lot 944 an uncirculated Noe 11 Pine Tree Shilling opened at \$2000 and was bid up briskly to \$15,000. One of the few lots to go to the book, lot #972, a Higley three pence, broad axe, opened at \$9000 with no floor action. This lot was not quite as nice in the copper as the photo might indicate. The next lot a nice EF Voce popular farthing inspired lots of action being bid up from \$800 to a hammer price of \$1300. A few lots later a choice EF45 Pitt token brought a remarkable \$2400. An outstanding Chalmers Shilling graded choice unc lot #987 was bid to \$5250. Seems like a better deal than a choice unc St Gaudens twenty at 5K but maybe I'm just stupid.

Some beautiful Massachusetts copper was highlighted by lot 1014 the finest known example of Ryder 4-J Hammered down to dealer Don Valenziano at \$5000 for stock. The Connecticut were truly incredible. Lot 1042 a mint state 1786 M.3-D.9 was bid to \$11,000. An EF Hercules Head M.5.3 N went to \$4250. A beautiful mint state 1787 M.48-g.5 R6 brought \$15,000 with several bidders still in at over \$10,000. An incredible M.3-b.1 in mint state opened at \$1400 and was eventually hammered down at \$12,500 to dealer Anthony Terranova for his personal collection. Tony also purchased what was to me one of the outstanding coins in the sale, an absolutely flawless 1786 Vermont RR9 Baby Head. This issue typically comes on flawed planchets, fissures, corrosion, striations are the rule. A beautiful problem free Baby Head like this is an incredible rarity. The finest known is the Redbook plate coin which was stolen years ago and has never been recovered. Lot #1334 is the second finest known. \$4500 will sound very cheap ten years from now.

There were many rare New Jerseys and these brought prices commensurate with their rarity. lot 1251 a 1786 M.16-J R6 brought \$1700. #1263 1786 M.21-R in VG brought \$2800. But the really remarkable results were realized by common varieties in choice middle grades. An EF M.43-D is by no means a rarity but lot 12833 realized \$950. M.46-E commonly comes in higher grades, here a nice EF coin lot 1286 brought \$1250. M.50-F Horses Head Left is a large and popular variety. It is quite unusual to find an example in nice condition. Perhaps \$2500 for a nice VF will seem reasonable in a few years. A sale like this is bound to stimulate new interest in Colonial coinage. we can probably expect prices to rise a bit as a result of the sale. Who can tell for sure. One thing is certain. It will be years before a comparable collection is offered at auction. By then the strong prices in this sale will again be seen as bargains.
